

Healing a Broken World

☆☆☆ Ecology: Renewable energy and Nuclear power plant problems ☆☆☆

Two years have passed since the Great East Japan Earthquake. Do you want to join us to listen to the voices of people affected by the nuclear disaster in Fukushima? Their sufferings, their complex emotions, their present reality should not be forgotten. And facing a world that has been broken, we also would like to invite you to think together with us about reconciliation with God, with our neighbors and with the whole creation. We will be happy if you join us!
Reference book: 『Healing a Broken World』 (Jesuit Social Center, Christian friend, INC.)
